BEER AGAIN BEATS PRESTON

Hard Fought Game Ends in 5
to 4 Score—Real Bal-
loon Comes Down.

The best exhibition of baseball seen on the local diamond this season greeted one of the largest crowds that has attended the game so far this year. It was a four to five contest and again in favor of Salt Lake. With two out and two men on bases in the ninth, Mortensen came up and sent a long fly to the middle field. It looked good and would have brought in the winning run for Preston, and pulled it down, retiring the side and saving the game for Dubel's coits.

The outcome was always in doubt and several times Stephens, the one-armed twirler of the locals, was in a bad hole, but on each occasion he came out smiling, eight times his delivery was located by the Preston crowd, while the tallors found Murphy for ten safe ones.

Northrop made one of those wild throws into the right field bleachers and let in two runs, equaling the throw made by Barratt the day before for Preston. This throw was responsible for three runs made by the visitors.

Ridd, the kid second baseman, did some mighty clever work, backing up throws, especially at first.

A feature that was not down on the program occurred in the eighth inning when Mrs. Goda, the balloonist, dropped on the second bag. While the game was in progress the balloon at the Salt Lake went up. After gaining a height of about 1,000 feet Mrs. Goda dropped and swayed the parachute so as to carry her right over the diamond. The lift came to the second base without an accident and the empty balloon settled near the back-stop position. The score:

LARGE CROWD; GOOD RACING
Clarke's Fine Riding on Ogden Sauer Track Brings Forth Much Applause.

(Special to The Herald.)
Ogden, July 14.—The best racing card of the season was run off at the Glenwood track this evening. There were several sensational finishes and more than one event brought the crowd of 1,200 people to their feet. That there were no records broken is probably due to the fact that a stiff breeze blew across the track, making fast time impossible.

Among the professionals, Clarke was again the whole show. The tape was Italian has become a warm favorite with the Ogden fans and when, with a remarkable burst of speed, he captured the first money in the two-mile lap, handicap, race, he was greeted with loud applause. The most exciting finish of the evening was in the final half-mile open, professional, race, when Downing and Clarke fought hard for first money. The latter, however, was able to push across the tape a half length to the good.

In the five-mile motor-paced race, Downing, paced by Gusie Larson, had no trouble whatever in disposing of Samuelson, who was paced by his brother. For some reason Samuelson could not hold the pace, especially in the first mile, while Downing rode a pretty race and finished almost three laps ahead, in the slow time of 7 minutes 15.2 seconds.

The five-mile motor race between Samuelson, Lawson and Heagren was one of the best ever seen on the local track. Lawson's machine failed before the finish and Heagren and Samuelson struggled for first honors. The race apparently belonged to Heagren when the tape was crossed, as he finished half a length ahead.

The unlimited Australian pursuit race, amateur, divided down to a struggle between Giles and De Mara after a few circles of the track and the two men tugged away for almost ten minutes before Giles proved himself the better man. Schnell easily won the one-mile, amateur, handicap race.

A special meet will be held on the local track next Wednesday evening, with a five-mile motor race as one of the features.

The summary:
Five-mile motor-paced race, professional—Downing, Samuelson. Time, 11:35 2-3.
One-mile, amateur—Schnell, Giles, Murphy, Diefenbacher. Time, 1:56 1-5.
Final half-mile open, professional—Clarke, Downing, Wilcox, Munroe. Time, 1:30 4-5.
Unlimited Australian pursuit race, amateur—Giles, 1st; De Mara, 11th; yards; Diefenbacher, 18th; yards; Schnell, 38th. Time, 9:06.
Two-mile lap handicap, professional—Clarke, West, Wilcox, Samuelson. Time, 8:47 1-3.
Five-mile open motor race, professional—Heagren, Samuelson, Lawson. Time, 6:30 4-5.

SHOLES OR HYLAND.
Stockyards Scrapper Slated for One or Other.

Chicago, July 14.—There is a possibility of a fight, Harry Gilmore, jr., who looks after the affairs of the stockyards fighter, today received word from a Denver club asking that Packey meet Muggsy Sholes of Cheyenne, Wyo. Gilmore is seriously considering the battle and declares that if nothing comes of the proposed match with Hyland he will accept Sholes. Packey met Sholes the battle will be ten rounds at 120 pounds.

St. Louis City, July 14.—Williams outpitched Jackson today and St. Louis City took the last game of the series from Pueblo, 2 to 0. Rain stopped the second game after the first inning, the score being 1 to 0 in favor of the home team. Score:
First Game: St. Louis City, 000 000 100—2 8 1; Pueblo, 000 000 000—0 3 0.
Batteries—Williams and Sheehan; Jackson and Drill.

Des Moines, July 14.—The second game of a double-header here today broke up in a first fight between Manager Holmes of Lincoln and Outfielder Kirkhill of Des Moines. Kirkhill, the Lincoln pitcher, was serving as umpire, and allowed Holmes to run around the base line to dodge the catcher. The game continued for an inning, but in passing, Holmes and Kirkhill made uncomplimentary remarks and then clinched and exchanged blows. They were separated and the game called. Both teams returned to town in street cars. Scores:
First Game: Des Moines, 000 002 000—2 5 5; Lincoln, 230 001 001—7 9 1.

LIVE AUTOMOBILE GOSSIP

Wheeled carriages were first used in France in 1669.
Falling a victim to "motoritis" Alfred B. attended his Philadelphia youth of 24, sold his birthright to an estate of \$50,000 for a loan of \$3,500, with which to buy an automobile. He was unable to do so, and sold it for a mere song and has now begun suit to recover his right to the estate.
In addition to its Lake Mahopac and Long Beach club houses, the City and County Motor Club is making arrangements for another country home nearer New York City, to provide a rendezvous for the members of the club, who take short evening trips after business hours.

While F. C. Whitney, the American horseman, was in London recently he had an urgent business call to Florence. He made the trip both ways in an automobile, covering 3,000 miles through France and Italy in less than seven days. Wherever possible he drove at the rate of fifty miles an hour.

A competition for devices which will prevent cars from being stolen is being organized by the French association General Automobile. It is intended to develop apparatus attached at once to prevent tampering with cars left unattended and to Italy in less than seven days. Wherever possible he drove at the rate of fifty miles an hour.

Worse troubles than those experienced in the desert awaited the contestants in the Peking-Russia race between Ugra and Kliaha. Several cars became mired in deep mud, and the passengers, being at the mercy of semi-savage Mongolians, who, however, were willing to help the motorists out when money was shown them.

Darlington S. Rhodes of Denver, one of the leading road engineers of the country, has been interviewing motorists of Pennsylvania upon the proposed \$25,000,000 state highway between Philadelphia and Pittsburgh. He declares that the proposition, though defeated in the last legislature, is not dead by any means.

When the contestants in the Peking and Paris race reached the monastery occupied by the Lama of Urga, who is second only in importance to the Grand Lama of Tibet, the princely potentate had attended his motor car, a motor car of his own, which proved to be cheap and worthless. Just who "stuck" the Lama, the Europeans were unable to discover.

While the English judges appear to be strongly prejudiced against motorists, English juries, seemingly, desire to play fair. An autoist was sued recently at Bad Homburg for driving a motor car without a license. The jury found for the plaintiff, but the judge, in his verdict, stated that the car was a good one and the driver a "first class" one.

A very good "manoeuvre" for covering a torn or cut outer tire casing may be improvised out of an old-fashioned leather boot. A strip three or four inches longer than the rupture in the tire casing should be cut from the softest part of the booting and should be fastened rapidly between the hands to render it pliable. It should then be bound firmly in place, anything from a stone cord to a leather thong serving for the purpose, care being taken to "anchor" the lashing to one of the spokes so that it cannot creep.

SOCKS SEYBOLD'S KICK.
Seybold, the big right fielder for the Athletics, blessed with a perfect digestion and an appetite that is always willing to get busy. It is said that the ostrich has nothing on Socks in the digestion department. Consequently he can feed at the quick-lunch counters along the train route and never suffer through the deal.

This statement, taken in conjunction with the stuff that is laid out by the vendors who run the shoe stores, may seem marvelous, but it is nevertheless true in the case of the Athletics' heavy hitting outfielder.

When the price of beef took such a sudden jump the other day Socks was reading about it, and it evidently excited him. He had not been long at the first stop outside of Boston in order to pay his compliments to a station lunch room. He had not been long when he came in a great state of excitement and said to Harry Davis, who is a married man, and who consequently was thinking about getting a wife, "I'm talking about meat going up, Harry, why, I ain't anything. Here they're even gone to work and put the tariff on doughnuts." queried Harry, who didn't seem much excited over Seybold's startling information.

"Sure it's so," cried out Seybold. "They used to give me four for a cent, and now," he almost shrieked, "they cut it down to three for a nickel, and what is more, they are making the holes twice as big in the middle."

NELSON-BRITT START TRAINING

Two Lightweights Getting in
Shape for Fight at San
Francisco.

San Francisco, July 14.—Battling Nelson, accompanied by Manager Billy Nolan, has left for Lake Tahoe, where the latter will pass a couple of weeks. Nolan will see him comfortably located in the mountains and will then return to this city. Jimmy Britt is already at Harbin Springs, where he is training for his fight with the local lightweight champion, Jimmie Britt, on the night of July 31.

The important problem of the selection of a referee for the fight must be settled soon. There was a deadlock over this before, and the managers may have some difficulty in agreeing upon a man. They have agreed that the one to be selected must be identified with boxing in this district, so this shuts out eastern referees or those from Los Angeles. Neither seems to have any one referee in view, so if they approach the question in a liberal minded way it should not take them long to decide upon a man satisfactory to public and boxes alike.

Manager Nolan is seriously considering the question of training Nelson at the state fair grounds and kept the crowd laughing on the grand circuit. Immediately after his trial here July 4, when he made a mile in 2:46, he developed alarming symptoms of aneurysm in the right arm, but they have disappeared, and he is working out as if there had been no sore.

W. J. Andrews, his trainer, is working her some slow miles against Ashlandor, Mrs. Stout's fast trotter.

NICOTINE'S REDUCED HALF

No Great Secret About the
"Caporal Doux," the Popular
Tobacco in France.

(Special to The Herald.)
Washington, July 14.—Upon an American Request Consul General Frank H. Mason of Paris has prepared the following report on the introduction of "nicotines tobacco" in France. It has a popular name known as "Caporal Doux," or the so-called "nicotines tobacco," in France, is simply ordinary caporal tobacco which has been treated by washing with water until the ordinary proportion of 2 1/2 per cent of nicotine has been reduced to 1 per cent. In this form it is used for smoking in pipes and for the manufacture of cigarettes, which find a certain favor among smokers who prefer a light flavor or who, by reason of nervous or cardiac weakness, are wary of nicotine.

Ordinary caporal is a mixture of French, American and Oriental tobaccos, prepared by the "Regie," or government establishments, which has a monopoly of the manufacture of tobacco, cigars and cigarettes in France. It has a somewhat rank, but not unpleasant flavor, and is the cheapest, most popular form of tobacco used in France for smoking purposes.

Water Used in Washing.
About eight months ago the French government, finding that there was a growing demand for so-called "nicotines tobacco," which had been made on a small scale by certain druggists, and which was also manufactured in Belgium, began the manufacture of a similar product by denicotinizing caporal tobacco through the action of water, which, in reducing the proportion of nicotine from 2 1/2 to 1 per cent, also washes out the ingredients, so that the weight of the tobacco is reduced, according to the quality of the leaf, from 15 to 30 per cent. It is this loss of weight rather than the actual expense of the process, which constitutes the chief element of denicotinizing, and explains the fact that ordinary caporal tobacco, which sells at \$2.41 per kilo (2.2 pounds), is advanced in value when denicotinized to \$3.88 per kilo.

Process is Simple.
The process of washing is simple, and is facilitated by the use of automatic machinery, but it requires careful and constant supervision by a skilled and trustworthy operator in order that a uniform product, containing the specified percentage of nicotine, may be obtained.

"Caporal Doux" is retailed at the government tobacco shops in packages of 50 grams for 8 centimes, or 16 cents per package, equal to about \$1.46 per pound avoirdupois.
Cigarettes of the same tobacco are sold in packages of ten each for 35 centimes, or 7 cents per packet, whereas ordinary caporal cigarettes of the same number and size retail for 30 centimes, or 6 cents per packet.

**Age in
Fisher
Beer.**

Brewers frequently call the attention of the public to the fact that age is an important essential in brewing.

Which is quite proper, because the healthfulness of beer depends much upon its thorough lagering, or aging.

To get its product to the required ripeness, a brewery must have ample storage capacity.

The Fisher brewery has storage room for hundreds of barrels. Every bottle of Fisher beer is matured for months before it goes on the market.

Owing to this and its high quality, Fisher beer is remarkably wholesome and healthful.

Have you ever visited our brewery? If not, you are invited to do so. It will interest you to see how our beer is made.
